

APRIL 23RD & 30TH GRANITE MOUNTAIN PRESERVE DEER STUDY

Help Us Determine the Health of the Herd!

Join the **Hudson Highlands Land Trust** for a conservation science study and an off-trail walk! We'll be learning about the deer population on our new property, **Granite Mountain Preserve**. Explore the woods in teams, while walking one or more half-mile-long transects to estimate the density of deer per square mile. Expect to walk at least two miles on rough terrain. Best for adult volunteers; students age 12+ welcome with an adult guardian.

For more information, please email: granitemt@hhl.org. To volunteer, please [register](#) in advance.

**Learn a lot about
deer ecology and...**

**the scientific methods
of data collection in the
field**

**how to estimate animal
populations from scat
surveys**

**how to stay on a
compass bearing**

**how to follow a transect
on your smartphone**

**Two sessions each day:
Morning 9:30am – 12:30
Afternoon 1:00-4:00**

**HHLT'S GRANITE
MOUNTAIN PRESERVE
PUTNAM VALLEY, NY**

**Directions to the site
and other details will
be provided when you
register.**

Hope you can join us!!
